HOW HUMAN LIFE BEGINS. ✓

A description of a motion picture not a photoplay
copies of which are not offered for sale. Copyright
on which is applied for by Herman J Brown.

The film shows the organs that secrete Ova and Spermatozoa
and by means of animated charts describes the processes
of Mitosis Cell cleavage and fertilization.

It gives a life history of the gametes.

It describes by means of animated charts the process of
gland transplanting and shows the children resulting from such
transplanting.

It describes the action of glands. Shows goat herds and glands.

It is wholly a film of scientific and topical interest.

The film is in five reels with a length of 4700 feet.

This document is from the Library of Congress
“Motion Picture Copyright Descriptions Collection,
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
